Center for Health

Be a Part of I-TECH's Future!

At the International Training and Education Center for Health (I-TECH), we bring a spirit of respect, trust, and collaboration to all that we do. Our offices and projects span across Africa, Asia, and the Caribbean, and join over 700 international and domestic staff in the mission of providing effective prevention, care, and treatment of infectious diseases in resource-limited settings. Together, I-TECH teams support the development of a skilled health care workforce and well-organized national health delivery systems worldwide.

As a center operated jointly through the University of Washington and the University of California, San Francisco, I-TECH combines the research, resources, and expertise of these institutions and the strength of our global partnerships. Our collaborative and diverse teams are comprised of faculty, students, and staff from all over the world. More than 80% of our workforce is hired in the countries where we work.

I-TECH's teams approach the rich and complex work of global health with an attitude of hope. We are linked by our professional standards, our personal connection to our projects, and our commitment to integrity, adaptability, and quality.

"The best thing about working with I-TECH is the people. I feel fortunate to work with dedicated, skilled, and caring global health professionals from all over the world. They inspire me every day!"

-Anne Meegan, Associate Director, Global Health Programs Division

Employee benefits include:

- Excellent medical and dental insurance plans
- Retirement and life insurance
- Tuition exemption at University of Washington and local community colleges (Seattle-based positions)
- Professional development opportunities
- Paid leave

In addition to recruiting staff for current and potential openings, I-TECH also hires qualified experts to fill temporary positions or consultancies. To receive updates about these opportunities, please join our Employment Mailing List. Visit www.go2itech.org/employment for instructions.

"Working at I-TECH, you are challenged every day to think about how to improve health systems, and how to measure the impact of our work. We get to work closely with ministries of health to help them address their pressing issues, from building a strong health workforce, to building information systems, to helping hospitals improve their quality of care."

-Emily deRiel, Global Health Programs Team Leader

"I like working at I-TECH because it keeps me on my toes. It is a fast-paced, dynamic work environment filled with incredibly bright, flexible, hard-working, and dedicated people. Working on projects within and across countries, I have learned so much about HIV, training development, project management, and other topics from colleagues in Seattle and all over the world, and I've been exposed to great thinking, ideas, and innovation."

-Julie Stein, Technical Officer: Training Development
